		Prepared by	 Rayando C
JOB POSITION : Foreman Welding Threading & Insulator			
STRUCTURE			
1	Superior		
	Direct	: Supervisor produksi CF, CM and WT	
	Indirect	: Manager Metal Shell and Insulator	
2	Subordinate		
	Direct	: Production Support and Operator CM &WT	
	Indirect	: -	
3	Equivalents Position	: Junior Staff/Foreman/Engineer	
4	Area	: Welding Threading and Assembly insulator	
5	Department	: Metal Shell & Insulator	
SCOPE OF WORK Supervising, controlling, and conducting the process of production in the section of CM & WT by referring to PPC plan within recommendation of Supervisor ; target oriented; quality objective; and paying attention to the environmental quality policy as well.			
INTERACTION			
1	Internal	: - Production - Quality -PP - PE & Maintenance - HC -HSE	
2	External	:	
DIMENSION OF WORK			
1	Financial	: - Material Cost - Production Cost	
2	Non Financial	: - Production Target - The Number of Product's Type - Product Quality - The number of WT machine - The number of subordinate	
INDICATOR : Refer to Performance Criteria

RESPONSIBILITY**A. Planning**

- 1 Planning the improvements that are considered necessary to the problem of activities in the completion of daily work through PDCA method
- 2 Daily manpower arrangement to fulfill target.

B. Organizing

- 1 Managing the role of operator when there is a vacant position to keep the sustainability of production process without neglecting task to supervise other machines.
- 2 Assisting the assistant manager in developing technical and non-technical skill of operator in Welding Threading & Insulator line
- 3 Keeping and taking care of every resource of company
- 4 Responsible for: product report (Passed or not), the use of supporting material, type changing; which relates to ERP
- 5 Verifying and making decision on product quality based on size and visual check by referring to the specification
- 6 Manage the important work environment which relating to other people & department through relevant SOP (Company Standard Operation) & WI

C. Implementing

- 1 Taking part in keeping the occupational safety and health in workplace including wearing Personal Protective Equipment (PPE)
- 2 Support and implement company's program (TPM activities, QCC, Kaizen, 5S, etc.) in each department to achieve company's target
- 3 Implementing 5 S and Internal Self Audit of 5 S
- 4 Implementing ISO 9001, ISO 14001, ISO IATF 16949 and ISO 45001 for each job / activity
- 5 Implement any policies related to Environment Management System in job activity as specified by company
- 6 Fulfill job's objective, environmental target, and quality objective in workplace based on determined by company
- 7 Applying the system of Management Occupational Health & Safety (K3) that is specified by the company.
- 8 Performing the handling hazardous material (B3) or waste of hazardous (B 3) & Non hazardous (B3) related with working area
- 9 Able to perform emergency response measures in each department
- 10 Implementing Information management system (IE: AX, Flexnet...etc) in accordance with its authority

D. Monitoring & Reporting

- 1 Doing daily patrol and control on production process
- 2 Supervising and controlling production process in Welding Threading & Insulator line based on the quality procedure to produce products that meets the target and the standard of quality to keep the continuity of production
- 3 Maintaining and keeping Welding Threading & Insulator machine, working tools, and working environment in a good condition; and reporting it in form of checksheet
- 4 Carrying out the administration related to production process based on existing procedure
- 5 Making Report related to machine condition, production process, and production result to the head, as well as the following shift, and following up the result of report from previous shift

E. Development of Human Capital

- 1 Assisting the assistant manager in analyzing every problem occurs in Welding Threading line to maintain the process

AUTHORITY

- 1 Supervising and controlling production process in Welding Threading & Insulator Section
- 2 Operating and Setting Welding Threading machine and supporting tools
- 3 Keeping the accuracy of report data system information management system update
- 4 Maintaining and taking care of Welding Threading & Insulator machine, working tools, and working environment
- 5 Carrying out production process based on PP schedule
- 6 Controlling product quality and quantity
- 7 Stopping the production process when there is a defected product
- 8 Giving coaching and training to Welding Threading operators
- 9 Giving endorsement of taking day off, warning, and assessment to Welding Threading & Insulator operator under consideration of assistant manager and production manager
- 10 Making and checking the compatibility of working procedure, OPL, parameter under the endorsement of asst. manager/ manager
- 11 Keeping the accuracy of management information system (AX, Flexnet...) report up date.

TRAINING NEEDS : Refer to Competency Map

JOB QUALIFICATION

- 1 Education : D-3 / S-1 Major in Industrial Eng./Mechanical Eng./ Metallurgical Eng.
- 2 Experience : 2 years / Fresh Graduate
- 3 Competency : Refer to Competency Map
