CYBER BUSINESS CONTINUITY PLAN GUIDELINES

Article 1 - Objectives

The objective of the Business Continuity Plan is to coordinate the recovery of critical IT system in managing and supporting the business recovery in the event of a facilities disruption.

This can include short or long-term disasters or other disruptions.

Article 2 - Scopes

These guidelines apply to all areas, activities, and personnel of the Company engaged in the utilization of IT-based technology. Compliance with these guidelines is essential to ensure the effective and secure use of technology across the organization.

Article 3 – Definition of Terms

Definitions that are required for these BCP policies are mentioned below:

- 1) “Cyberattacks” refer to acts that attempt to destroy IT systems or steal information by accessing IT systems illegally.
- 2) “Security incidents” refer to events that could lead to a security threat of losing confidentiality, availability, and integrity due to a cyberattack from malicious third parties and our systems are impacted.
- 3) “Critical applications or IT systems required for business activities” (hereinafter called “IT systems that serve as the foundation of business activities”) refer to critical IT systems, which are essential for critical businesses to be implemented, within the entire company’s fundamental systems managed by IT Department and systems managed by each operations department.
- 4) “BCP Standards” refer to documents prepared by each operations department regarding plans and procedures for companies to continue their businesses and services in the event of cyberattacks. Supplementary documents such as forms are also included in the BCP Standards.
- 5) “Business Continuity Responses” refer to continuing business activities temporarily by implementing alternative measures (including responses according to manuals if systems are unable to be restored.)
- 6) “Restoration Responses” refer to completely recovering business activities back to the peacetime condition, which is the state before BCPs were activated, from the condition that alternative measures have been implemented and the cause of the BCP activation has been solved.
- 7) “The Company” refer to PT Niterra Mobility Indonesia.

Article 4 – Basic Policy

The Company shall take actions in accordance with the event that a cyber incident is detected—one that may significantly impact business continuity or product supply due to cyberattacks or similar threats—the following policies will be adhered to:

- 1) Minimize the impact of the incident from spreading.
- 2) Restore critical business operations and ensure the continuity of supply.

Article 5 – Outlines of Peacetime and Emergency Activities

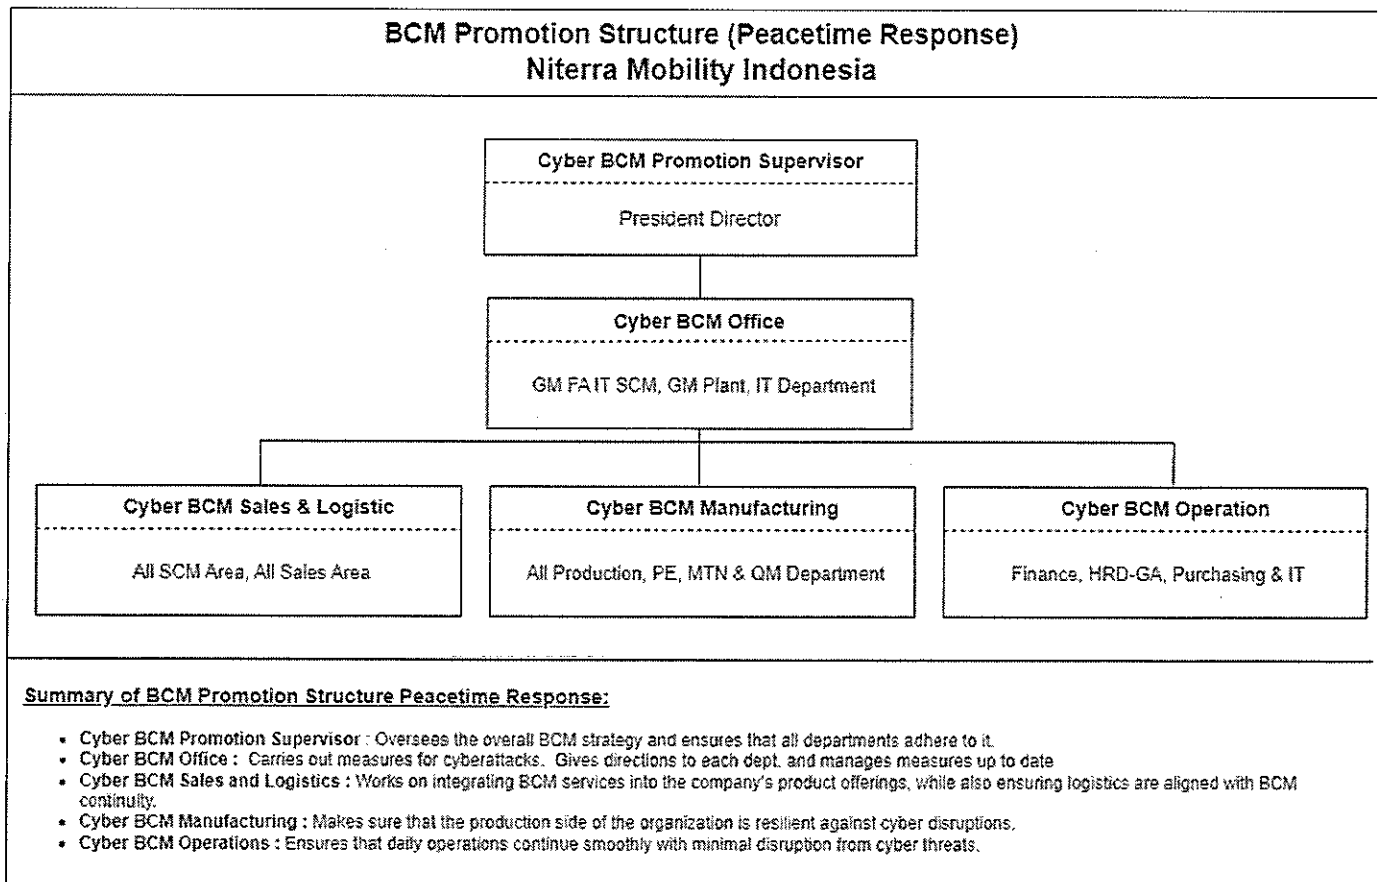

1. Followings are the outlines of peacetime response activities:

Refer to Chapter 2. for details.

- 1) Establish a promotion system to be led by all BCM promotion supervisors and the Cyber BCM Office.
- 2) The Cyber BCM Office directs an IT System Company and each operations department to identify IT systems that serve as the foundation of business activities and prioritized businesses.
- 3) The Cyber BCM Office directs each operations department to implement risk assessments and prepare BCP standards in case IT systems that serve as the foundation of our business are down.
- 4) The Cyber BCM Office directs each operations department to prepare plans for BCP education or training and implement them. Each operations department reports the training results to the Cyber BCM Office. Training shall be implemented on a corporate-wide or an inter-departmental basis if necessary.
- 5) Any issues arising through preparing BCPs or trainings are listed on the “BCM Issue Management Table” and they are updated at related organizations. The Cyber BCM Office checks BCM activity status from each operations department and reports the progress of the BCP effectiveness at meetings, etc.

Article 6 – Structure and Role Peacetime Responses

The following structure shall be established for peacetime responses:

Article 7 – All BCM Promotion Supervisors

- 1) President Director shall assume the role of BCM Promotion Supervisors
- 2) All BCM Promotion Supervisors shall be responsible for overseeing the implementation and effectiveness of Business Continuity Management (BCM) practices within the company

Article 8 – Cyber BCM Office

- 1) President Director shall oversee the operations and services of the Cyber BCM Office. The IT Department is authorized by the President Director to manage the functions and activities of the Cyber BCM Office.
- 2) The Cyber BCM Office shall be responsible for managing Business Continuity Management (BCM) related to cyber incidents within the Company.

Article 9 – IT System and Identifying Business Triage

- 1) The Cyber BCM Office shall direct the IT Department to compile a comprehensive list of all IT systems and applications owned by the IT Department.
- 2) The Cyber BCM Office directs each operations department to identify the IT systems that are critical to business activities. Each operations department must also determine which businesses require triage and report this information to the IT Department.
- 3) IT Departments will identify which IT systems required for prioritized business.

Article 10 – Risk Assessment and Response

- 1) The IT Department and each operations department will conduct risk assessments in the event that IT systems essential for business activities become non-operational.
- 2) The Cyber BCM Office and IT System Company determine to triage IT systems that serve as the foundation of business activities to be restored based on results of risk assessments that are reported from each operations department at the time of the BCP activation.
- 3) Each operations department shall develop precautionary plans and implementation policies necessary for responding to the findings of the risk assessment. These plans must be shared with the Cyber BCM Office.
- 4) The Cyber BCM Office reviews the precautionary plans prepared by each operations department and provides advice if necessary.
- 5) Each operations department follows those precautionary plans and implementation policies to mitigate risks.

Article 11 – Preparation of the BCP Standards

- 1) The Cyber BCM Office directs each operations department to establish Business Continuity Planning (BCP) Standards for businesses identified as requiring immediate restoration and resumption of operations.
- 2) Each operations department shall prepare Business Continuity Planning (BCP) Standards based on the results of risk assessments, implementation policies, and precautionary plans related to critical products, services, and business operations. Prior to preparation, departments should consider the following:
 1. Evaluate the actions necessary to implement alternative measures that will allow for the continuation of business operations that have become temporarily disrupted as part of business continuity responses.

2. Assess the strategies required to fully restore business activities to their pre-incident state after the BCP has been activated, as part of the restoration process.
- 3) Follow the BCM Bylaws and the Earthquake BCP Guideline regarding other matters related to the BCP Standards preparation. If the “BCM Office” is indicated in the references, the Cyber BCM Office is in charge of any responses.

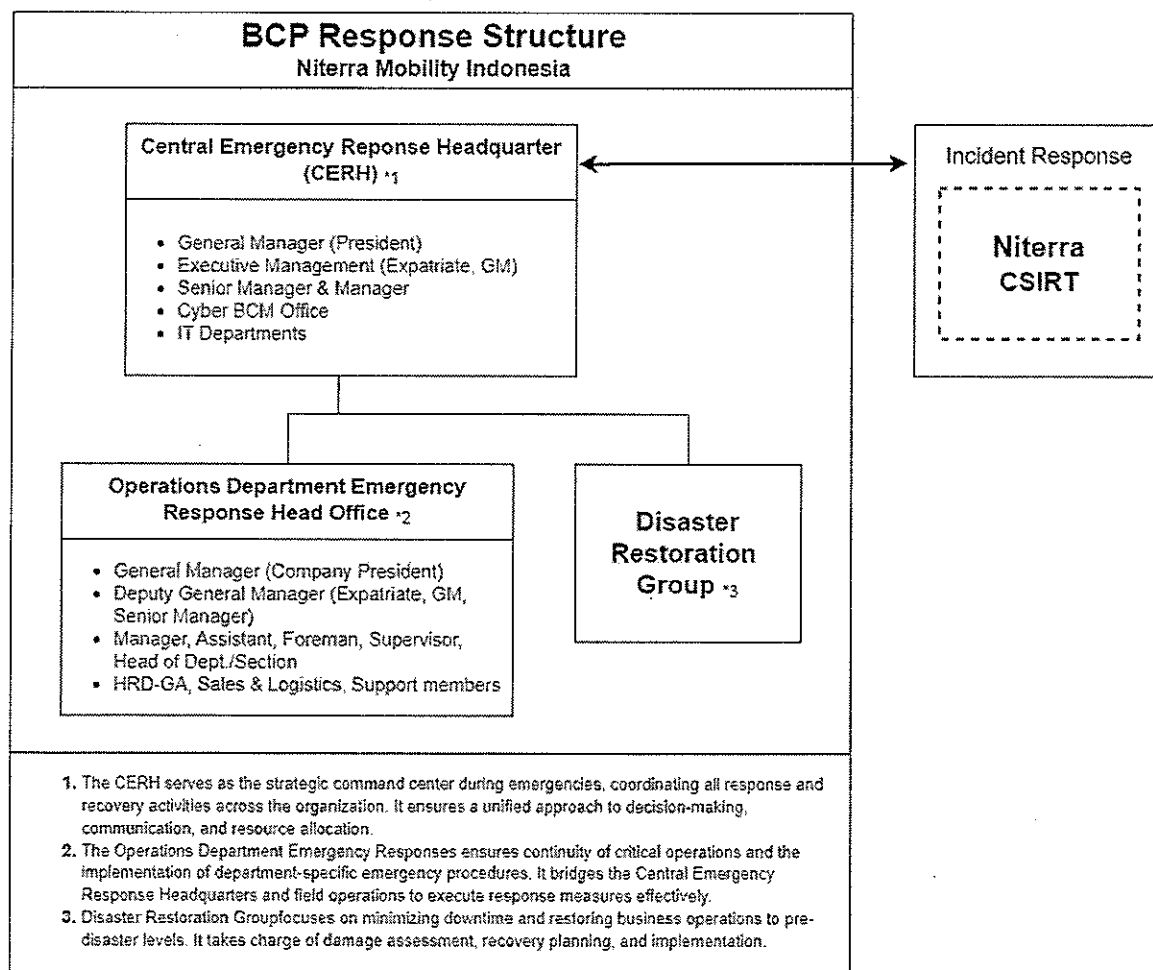

Article 12 – Education and Training

- 1) Each operations department should conduct regular education and training sessions to prepare for potential crises affecting IT systems that are essential for business activities.
- 2) The IT Department and each operations department shall conduct education and training sessions focused on critical activities, such as restoring systems from backups, related to the IT systems that underpin business operations. The IT Department and each operations department will share information regarding the responses and training implemented.
- 3) The Cyber BCM Office shall develop and implement comprehensive education and training programs designed to enable the immediate resumption of critical business operations in the event of a crisis affecting the IT systems that are fundamental to business activities.

Article 13 – Structure and Roles for Emergency Response

The following roles shall be established for emergency responses:

- (1) Central Emergency Response Headquarter
- (2) Operations Department Emergency Response Head Office
- (3) Disaster Restoration Group

Article 14 – Central Emergency Response Headquarter

- 1) The President, or a designated individual with appropriate authority, such as the General Manager, shall act as the General Manager of the Central Emergency Response Headquarters. In this capacity, the General Manager is responsible for critical decision-making immediately following a disaster. This includes issuing directives, ordering operational shutdowns, and managing the distribution of internal and external communications.
- 2) During the restoration period, the IT Department shall obtain detailed information on the extent of damage and business continuity response plans from each operations department and report it to The Central Emergency Response Headquarter and Niterra CSIRT. These response plans outline how business operations will continue using alternative measures until full system recovery, based on preliminary measures created during peacetime.
- 3) The Cyber BCM office will establish Central Emergency Response Headquarters in the event of a major failure, as defined below.

Prior to its establishment, the President must be informed, or the General Manager if the President is unavailable.

1. When any of the following disruptions occur or are anticipated in one or more operations departments:
 - a. Inability to create production plans or issue production instructions
 - b. Inability to carry out production activities or inspections
 - c. Inability to execute shipment-related operations
 - d. Inability to monitor or supervise production status
 - e. Inability to replenish parts to manufacturing plants
2. When errors or failures occur in external reporting data.
3. When other operations or management functions are affected by significant disruptions.

Article 15 – Operations Department Emergency Response Head Office

- 1) The President of the company, acting as the General Manager, is responsible for overseeing and making decisions regarding Business Continuity Plans (BCPs) within the company's operations departments.
- 2) The Operations Department Emergency Response Headquarters shall prepare a temporary restoration plan for each critical product, based on the target restoration time, and submit it to the Central Emergency Response Headquarters.
- 3) The Operations Department Emergency Response Headquarters shall be established upon the direction of the Central Emergency Response Headquarters when operations or sections within each operations department are impacted by an incident. If the impact cannot be immediately identified, each operations department must have pre-established structures in place, allowing them to promptly activate the Operations Department Emergency Response Headquarters at the request of the Central Emergency Response Headquarters.

Article 16 – Disaster Restoration Group

- 1) Once the Business Continuity Plan (BCP) is activated, the Disaster Restoration Group is responsible for securing necessary resources such as transportation, equipment procurement, replacement with alternative equipment, and arranging external resources (e.g., temporary staff or outsourced services). The Disaster Restoration Group must also share relevant information with Niterra CSIRT, as directed by the Central Emergency Response Headquarters and the Operations Department Emergency Response Headquarters.
- 2) The Disaster Restoration Group shall be established upon the direction of the Central Emergency Response Headquarters, as needed, to coordinate the restoration efforts following an incident or disaster.

Article 17 – Information Sharing Regarding Initial Response

After a cyber incident occurs, IT departments responsible for managing IT systems shall gather information regarding the incident response status, system operations, and impact assessment. This information must be shared promptly with the Cyber BCM Office.

Article 18 – BCP Activation

- 1) If the Cyber BCM Office determines that the Business Continuity Plan (BCP) needs to be activated, it will promptly report to the General Manager of the Central Emergency Response Headquarters and request a decision on whether to activate the BCP.

All relevant information regarding this decision will be reported and shared with organizations associated with the BCP.
- 2) The General Manager of the Central Emergency Response Headquarters shall evaluate the reports submitted regarding the necessity for activating the Business Continuity Plan (BCP) and will decide on whether to proceed with the activation.
- 3) The Disaster Restoration Group shall report the incident response status, scope of impact, and system operations information collected from IT departments that managing IT systems to the Central Emergency Response Headquarters. Upon review, the Central Emergency Response Headquarters will share relevant information, as determined necessary, with the Operations Department Emergency Response Headquarters and other Disaster Restoration Groups.

Article 19 – Draft and Implementation of Business Continuity Response and Restoration Plan

- 1) Each Operations Department Emergency Response Headquarters is responsible for determining which critical businesses will continue operations and which activities will be reduced or suspended, based on directives and reports received from the Central Emergency Response Headquarters.
- 2) Each Operations Department Emergency Response Headquarters is responsible for preparing comprehensive business continuity response plans to ensure the ongoing operation of affected businesses in accordance with the established Business Continuity Plan (BCP) Standards. Should any issues that the respective operations department is unable to resolve independently, they are required to request assistance from the Central Emergency Response Headquarters, other Emergency Response Head Offices, or the Disaster Restoration Group to effectively address and resolve these issues.
- 3) The Central Emergency Response Headquarters is responsible for consolidating and approving the business continuity response plans submitted by each Operations Department Emergency Response Headquarters.

- 4) Each Operations Department Emergency Response Headquarters is required to adhere to the business continuity response plans approved by the Central Emergency Response Headquarters and to implement the corresponding temporary restoration plans, which include alternative measures.
- 5) During the period of BCP activation, regular reporting among BCP-related organizations shall be conducted at least twice daily (morning and afternoon). This report will focus on the response status and any relevant policies, ensuring that all parties remain informed and coordinated in their efforts. If necessary, the General Manager of the Central Emergency Response Headquarters will specify the frequency of these reports.
- 6) Each Operations Department Emergency Response Headquarters is responsible for preparing restoration plans aimed at resuming reduced or suspended business activities once it has been confirmed that incident responses are complete. This confirmation will be provided by IT department, who will communicate their findings to the Cyber BCM Office.
- 7) The Central Emergency Response Headquarters is responsible for consolidating and approving the restoration response plans submitted by each Operations Department Emergency Response Headquarters. This process ensures that all plans are aligned with the organization's overall recovery strategy and objectives.
- 8) Each Operations Department Emergency Response Headquarters is responsible for implementing the restoration plans approved by the Central Emergency Response Headquarters. These plans must be followed diligently to ensure a coordinated and effective response to the incident. If any issues arise that cannot be resolved within the Operations Department, assistance must be requested from the Central Emergency Response Headquarters, other Emergency Response Headquarters, or the Disaster Restoration Group to address these challenges.
- 9) The General Manager of the Central Emergency Response Headquarters is responsible for officially declaring the deactivation of Business Continuity Plans (BCPs) once the primary business functions and services, including systems, management, and operations, have been fully restored and confirmed to be in a stable condition that ensures business continuity.

Article 20 – Post-event Activity

After all operations have been complete restored, the following shall be implemented:

- a. Conduct a detailed record and causal analysis of the cyberattack and consider recurrence prevention measures.
- b. Evaluate whether the BCP functioned appropriately and revise the BCP content if there are any points for improvement.
- c. Implement specific recurrence prevention measures, such as strengthening security measures and employee education.
